

Twilio Toll-Free Verification

Step 2/2 — Messaging use case · Copy-paste answer sheet

Replace every **YOUR-DOMAIN** placeholder with the public domain that serves the storefront these messages come from (e.g. pennpaps.com for the Penn Home Medical Supply tenant, or pennfit.up.railway.app). The URLs you submit must be reachable by Twilio reviewers without a login.

BUSINESS PROFILE (SET IN STEP 1)

CareMetric Breathe — the platform, not a tenant.

The Twilio account and its toll-free number belong to CareMetric Breathe, which operates the messaging platform on behalf of its DME customers. Enter the registered legal entity exactly as it appears on the EIN / incorporation record. Do NOT put a customer's name here (it is not "Penn Home Medical Supply", and it is no longer "PennPaps" — that storefront-only DBA was retired). Message bodies below are branded to the DME the patient bought from; the use-case description explains that relationship.

ESTIMATED MONTHLY VOLUME

100

OPT-IN TYPE

Web form

The storefront captures consent through a labeled checkbox on the order checkout form.

MESSAGING USE CASE CATEGORIES

1. **Account Notification** (primary)
2. **Customer Care** (secondary — covers HELP/STOP replies and inbound questions)

Do not select Marketing, Polling/Voting, or any Higher Risk category — your traffic is purely transactional and reviewers reject mismatches.

PROOF OF CONSENT (OPT-IN) COLLECTED — URL

<https://YOUR-DOMAIN/terms>

If the form lets you list more than one URL, also include <https://YOUR-DOMAIN/privacy> and <https://YOUR-DOMAIN/order>.

USE CASE DESCRIPTION (PASTE VERBATIM)

CareMetric Breathe operates a CPAP fitting, ordering and resupply platform for U.S. durable medical equipment suppliers, and sends this traffic on their behalf. Penn Home Medical Supply, a licensed DME, is the supplier whose patients receive the messages below, so the message bodies carry that supplier's name. Patients place an order through the supplier's storefront (<https://YOUR-DOMAIN/order>) and check a clearly labeled consent box authorizing Penn Home Medical Supply to contact them by phone, email, and SMS. After opt-in, we send transactional SMS messages from our toll-free number for: order confirmation, shipping updates, insurance verification follow-ups, prescription requests, and resupply reminders when the patient is due for new CPAP supplies (typically every 30 to 90 days, per their insurance benefit). Patients can reply YES/NO/EDIT to confirm or change shipments, HELP for assistance, and STOP to opt out at any time. We do not send marketing or promotional content.

SAMPLE MESSAGE (PASTE VERBATIM)

Hi John, it's Penn Home Medical Supply. Still use your CPAP and low on supplies? Reply YES to ship a refill. EDIT to fix your address. STOP to opt out.

E-MAIL FOR NOTIFICATIONS

support@cmbreathe.com

Twilio sends approval/rejection here, and the profile is the platform's — so this is a platform inbox, not the DME customer's. Substitute whichever address is actually monitored.

OPT-IN CONFIRMATION MESSAGE (OPTIONAL)

Penn Home Medical Supply: You're opted in to CPAP resupply reminders for the number on file. Approx 1-2 msgs per refill cycle. Msg & data rates may apply. Reply HELP for help, STOP to cancel.

HELP MESSAGE SAMPLE (OPTIONAL — VERBATIM WHAT HELP RETURNS)

Penn Home Medical Supply – automated CPAP refill reminders. Reply YES to confirm, NO to decline, EDIT to change your address, STOP to opt out. Standard message + data rates may apply.

PRIVACY POLICY URL (OPTIONAL)

<https://YOUR-DOMAIN/privacy>

TERMS & CONDITIONS URL (OPTIONAL)

<https://YOUR-DOMAIN/terms>

OPT-IN KEYWORDS (OPTIONAL)

START YES JOIN UNSTOP

ADDITIONAL INFORMATION (OPTIONAL, PASTE VERBATIM)

Penn Home Medical Supply is a HIPAA-aware DME supplier served by the CareMetric Breathe platform, which sends on its behalf. SMS traffic is strictly transactional to existing customers who have completed an opt-in checkbox on our order form at <https://YOUR-DOMAIN/order>. The consent text on the form reads:

"I authorize Penn Home Medical Supply to contact me by phone, email, and SMS text message at the number and email above regarding this order, insurance verification, shipping updates, and ongoing CPAP resupply reminders." Immediately below the checkbox we disclose: approximately 1-2 messages per resupply cycle, no marketing texts, message and data rates may apply, reply HELP for help and STOP to unsubscribe, with links to the Privacy Policy and Terms of Service. STOP/UNSUBSCRIBE/CANCEL/END/QUIT/OPTOUT are all honored automatically by our SMS handler with the confirmation reply: "You've been unsubscribed and won't get further messages from us. Reply START to resume." We will not share or sell phone numbers or SMS opt-in consent for marketing.

CONTAINS AGE-GATED CONTENT

No — leave unchecked.

CPAP resupply is not age-restricted content. The 18+ language in our Terms is a contracting requirement, not an age gate.

REQUIRED AGREEMENTS — CHECK BOTH

- I agree to the Terms of Service. **(Check)**
- I certify that the associated Business Profile is the originator of the phone calls and certify that I will participate in traceback efforts. **(Check)**

Both are accurate — your toll-free number is the originator (you're not relaying for someone else).

Reference — what the site already says

These are the verbatim disclosures Twilio reviewers will see on the public site. If a reviewer asks where consent or HELP/STOP language lives, point to these.

Order-form opt-in checkbox label (/order)

I authorize Penn Home Medical Supply to contact me by phone, email, and SMS text message at the number and email above regarding this order, insurance verification, shipping updates, and ongoing CPAP resupply reminders, and to store the order details I've entered above (including my contact, shipping, insurance, and prescription information) in Penn Home Medical Supply's secure system for fulfillment and recordkeeping.

SMS terms shown beneath the checkbox (/order)

SMS terms: By providing your mobile number you consent to receive transactional text messages from Penn Home Medical Supply at that number, including via automated systems. Approximately 1-2 messages per resupply cycle (typically every 30-90 days). No marketing texts. Message and data rates may apply. Reply HELP for help, STOP to unsubscribe at any time. See our Privacy Policy and Terms of Service for full SMS program details.

Privacy policy — Section 05 SMS / Text Messaging Notifications (/privacy)

Frequency: Approximately 1 to 2 messages per resupply cycle, plus transactional confirmations and any follow-ups if you do not respond. You will not receive marketing or promotional texts.

Help and opt-out: Reply HELP at any time for assistance, or STOP to unsubscribe from all Penn Home Medical Supply text messages. After you reply STOP we will send one final confirmation and then no further texts; reply START to resume.

Carrier charges: Message and data rates may apply. Carriers are not liable for delayed or undelivered messages.

No third-party sharing for marketing: Penn Home Medical Supply will not sell, rent, or share your mobile phone number or SMS opt-in consent with any third party for their marketing purposes.

Terms of Service — Section 04 SMS / Text Messaging Program (/terms)

Full program disclosure: program name, message types, message frequency, carrier charges, HELP behavior, STOP/END/CANCEL/UNSUBSCRIBE/QUIT/OPTOUT keywords, eligible carriers, and the no-third-party-marketing commitment. This is the URL recommended for the "Proof of consent collected" field.

Pre-submission checklist

Run through this before clicking Submit. A rejected TFV adds 1–3 weeks of latency.

■ Replace YOUR-DOMAIN everywhere

Swap each YOUR-DOMAIN placeholder above for your actual published domain. Test each URL in an incognito window to confirm it loads without authentication.

■ Confirm /privacy, /terms, and /order are publicly reachable

Twilio reviewers cannot complete the fitter funnel. /terms is the most important — it has the full SMS program disclosure in section 04.

■ Verify the Trust Hub Business Profile is CareMetric, not a customer

The Twilio account holder is the platform, so the profile carries the CareMetric legal entity — not "Penn Home Medical Supply", and not the retired "PennPaps" DBA. If the profile still names a customer, fix it before submitting. The message bodies staying supplier-branded is expected and is explained in the use-case description; that is the normal platform-sending-for-a-customer shape, not a mismatch.

■ Reconcile the quoted consent text with the live form

The "Additional information" answer quotes a long authorization sentence, but the storefront checkbox currently reads "I agree to receive text messages from " with a shorter sub-line, and the full disclosure lives on /terms. A reviewer who cannot find the quoted sentence on the page is a common rejection. Either quote the checkbox and its sub-line as they actually appear, or update the form to the longer language before submitting — but make the two match.

■ Decide imported-patient policy

Your TFV promises every recipient opted in via the web form. If you import existing patients via the dashboard CSV importer, those patients did NOT check this checkbox. Either restrict SMS to web-form opt-ins, or ship a one-time opt-in confirmation SMS to imports as their first message (with STOP honored before any further sends).

■ Toll-free number ownership

Confirm the toll-free number you're verifying is purchased in YOUR Twilio account (not pooled / not subaccount-borrowed). The traceback certification only holds if you are the originator.

■ Email inbox is monitored

Use a real inbox you actually monitor — the platform address (support@cmbreathe.com) for a platform-owned profile. TFV approvals and rejections arrive by email and can ask follow-up questions with short reply windows.
